SUMMARY

Detail-oriented and versatile professional with hands-on experience in web development, logistics operations, and technical troubleshooting. Skilled in modern full-stack technologies including React, Node.js, and MongoDB. Strong communicator with a proven ability to support team workflows and solve real-world problems in fast-paced environments. Background includes training in both technical and administrative disciplines, with strengths in digital literacy, documentation, and attention to detail. Currently pursuing a degree in Computer Science with a focus on full-stack development.

SKILLS

- **Technical Languages**: JavaScript, TypeScript, HTML, CSS, Python, C++, PHP
- **Frameworks & Libraries**: Node.js, Express.js, React, TailWind CSS
- **Backend Technologies**: MongoDB, MySQL, Firebase, PostgreSQL
- **Tools & Platforms:** GitHub, VS Code, Postman, Microsoft Office Suite

PROJECTS

1. TomoPudgy | https://github.com/anthonymoon2/TomoPudgy | https://tomopudgy.onrender.com/
   - **Description**: Built a calorie-tracking web app that helps users log daily meals and monitor intake, using a MERN stack and third-party API integrations.
   - **Skills Utilized**: API Integration
   - **Role**: Back-End Developer
   - **Tools**: Typescript, Node.js, Express.js, MongoDB, API, Apollo Server
2. Find-A-Programmer | https://github.com/joshcord99/Find-A-Programmer | https://find-a-programmer.onrender.com/
   - **Description**: Developed a tool for employers to search, view, and save GitHub profiles of developers using GitHub's public API.
   - **Skills Utilized**: API Integration
   - **Role**: Developer
   - **Tools**: Typescript, React, HTML, CSS

EMPLOYMENT HISTORY

In-Gate Clerk | Maersk   Jan 2025 - Present | South Gate, CA

Skills Transferred: Data Management, Process Optimization, Communication, Attention to Detail
Technologies used: WebEz, WebEC, PINC, Microsoft Office Suite

- Entered and managed container and shipment data using terminal operating systems, emphasizing data accuracy and real-time tracking

- Coordinated across departments (warehouse, dispatch, and security) to streamline gate operations and resolve technical discrepancies

- Analyzed shipping documents for compliance, ensuring alignment with port regulations and system protocols

- Provided front-line support to drivers, translating complex procedures into clear instructions—demonstrating strong communication and problem-solving skills

- Rejected incoming drivers whose containers were not assigned to our facility, ensuring proper traffic control and resource allocation

- Maintained digital and physical records for auditing, reinforcing a disciplined approach to documentation and data integrity

Software Developer | Reality AI   Dec 2024 - Present | New York City, NY

Skills Transferred: Problem-Solving, Team Collaboration, Adaptive Learning
Technologies used: Firebase, CSS, React, Node.js

- Assisted team members in understanding workflows and processes via Zoom sessions

- Conducted research to understand and navigate the codebase effectively

- Facilitated Zoom and Google Meet sessions and shared task updates, ensuring team alignment

- Ensured all deliverables met the required competence criteria before submission

- Participated in regular stand-ups to align team efforts and gather updates on ongoing tasks

- Learned and implemented Vertex AI tools, demonstrating adaptability and initiative in integrating new technology

- Supported teammates by providing explanations and clarifications to help them contribute confidently

- Collaborated on open-sourced projects to gain real-world experience

EDUCATION

- **Full-Stack Web Development Boot Camp Certificate** *(Completed)*
  University of California, Irvine - Irvine, CA

- **Associate Degree in Computer Science** *(In Progress)*
  Long Beach City College - Long Beach, CA

- **High School Diploma** *(Completed)*
  Tustin High School – Tustin, CA
